Lifespan: 11-17 years
Weight: 11-23 kg
Scientific name: Neofelis nebulosa

Did you know?

- A clouded leopard's ankles can rotate backwards, allowing it to climb head-first down trees and hang upside down from branches.
- It has the longest canines relative to skull size of any living cat, and can open its jaws almost 90 degrees. Its hind ankles rotate backwards, so it…
