Animal Fact Sheet

Name: _____ Date: _____

Red-eyed Tree Frog

Agalychnis callidryas

Agalychnis callidryas sleeps by day plastered to the underside of a leaf, eyes shut and green limbs tucked in so that the animal is a featureless green lump. The startling red eyes, orange feet and b…

Weight: 6-15 grams
Scientific name: Agalychnis callidryas

Did you know?

- Red-eyed Tree Frog eggs can hatch early if they sense vibrations from approaching predators, allowing tadpoles to escape danger.
- Hatching is mechanical and fast: the embryo releases a cocktail of enzymes from snout glands to weaken the membrane and then thrashes, and the whole …
